

Fo-Poxy (Aliccoat)

DESCRIPTION:

A two component Aliphatic Polyurethane with excellent color and gloss stability, resistant to chemicals, waterproof coating. Its beauty, durability and overall performance are unsurpassed by any other painting system. High flexibility ensures firm grip on metal surfaces even during vibration where most other paint systems crack.

PRINCIPAL USES:

Developed for quality painting of metal surfaces, wood, concrete, asbestos, cement, where excellent gloss retention, abrasion and chemical resistance are desired. Recommended for industrial plants, machinery such as pump externals, valves and other equipments which face corrosion problems as well as undergo vibrational stresses.

FEATURES AND BENEFITS:

- Excellent color and gloss retention after prolonged exposure to weathering.
- Watertight-It dries to a very hard film that serves as a watertight finish
- Maximum abrasion resistance-It has exceptional abrasion resistance for a paint film, and is able to withstand repeated scratching, scrubbing and repeated detergent washing.
- Excellent resistance to stains, solvents and most chemicals. It is also a highly durable finish for industrial plants because of its strong resistance to chemical attacks, pollution and corrosive industrial environments.

COVERAGE : 4-5 sq. mtrs. per Kg. mix

COLOUR : A variety of colours available.

Manufactured by :

AQUADRA FORSPEC PVT. LTD.
